Incredible speeds plus rock-solid reliability

Magix's X-PRO SSD drive enhances the responsiveness of your existing system with outstanding boot, loading and transfer times compared to mechanical hard drives. Our advanced technology makes X-PRO the ideal solution for PC enthusiasts, gamers, and video rendering professionals.

Powered by the latest-gen controller for reading and writing speeds up to 3200MB/s1 and 2700MB/s, this SSD is much faster than a traditional hard drive for higher performance, ultra-responsive multi-tasking and an overall more rapid system. Also more reliable and durable than a hard drive, X-PRO is built with Flash memory. There are no moving parts, making it less likely to fail than a mechanical hard drive. It is also cooler and quieter, and its shock and vibration resistance makes it ideal for notebooks and other mobile computing devices.

X-PRO is available in multiple capacities from 256GB to 2TB to give you all the space you need for applications, videos, photos and other essential documents. You can also replace your hard drive or a smaller SSD with a drive big enough to hold all your files.
